

PayJustNow Payment Gateway for Magento2

Introduction:

PayJustNow gives you, the online shopper, an attractive, responsible and rewarding alternative to credit and the freedom to buy what you want today and pay over time, interest-free.

PayJustNow system offers a compelling 'buy now, pay later' solution to shopping online. Simply it offers merchants the opportunity to add the service as a payment option to their online store.

Features:

- PayJustNow is always zero interest.
- PayJustNow offers your customers 3 equal interest-free installments and gives them a rad new way to pay-today!
 - Now : Time of purchase
 - now now : At the beginning of the following month
 - Just now : At the beginning of the month following let
- By using this, once you've approved, you'll not only have money to spend, but also access to a best-in-class
- The only fees this extension ever charges are for late payments so there's no need to worry.
- There is never an additional fee charges when shoppers pay on time.

How to Configure:

Login to Admin:

Admin → Stores → Configuration

In the panel on the left, click **Sales → Payment Methods**

Click to expand the PayJustNow Payment then click on the Configure button to start the configuration.
