Html Sitemap

Introduction

HTML sitemap extension helps customers to improve website navigation and SEO user friendly about collecting all the links in one page. It allows you to add different pages from sitemap to make it perfectly structured.

This extension gathers all of your website stores, categories, products, CMS pages and other additional links into one page.

The Sitemap Magento 2 Extension automatically generates HTML sitemaps for your Magento 2 store. It simplifies the process of creating and maintaining HTML sitemaps, which are essential for SEO and ensuring that search engines effectively index your website's content.

How to Configure:

Login to Admin:

Admin ➔ Stores ➔ Configuration

Under the SWT ➔ HTML Sitemap ➔ Configuration

Please see the below extension configuration image.
