

Minimum Order Quantity

Introduction

The **Minimum Order Quantity** extension helps to optimize sales, inventory management and production costs management. The Minimum Order Quantity extension is used to allow store owners to set a minimum and maximum quantity that customers must purchase before they can proceed to checkout.

Merchants can easily manage minimum and maximum quantity as per different customer groups using this extension. This extension functionality can enhance profitability, boost sales, streamline operations, and improve customer experience.

Features:

- Set minimum total order quantities in the shopping cart per customer group.
- Set maximum total order quantities in the shopping cart per customer group.
- Show messages to inform the Minimum Order Quantity requirement.

How to Configure:

Admin → Stores → Configuration

Under the SWT → Cart Qty Limit → Configuration
